Summary

Motivated and adaptable software professional with experience in frontend development and a strong problem-solving mindset. Seeking part-time or student job opportunities, available to start as soon as possible. Open to both remote and on-site work.

Education

Eindhoven University of Technology

Master of Science in Computer Science and Engineering

Present

Eindhoven

University of Mumbai - Thakur College of Engineering and Technology

June 2025

Bachelor of Engineering in Information Technology, Aggregate CGPA 9.33

Mumbai

Experience

ICICI Lombard

August 2025 – August 2026

Software Engineering Associate

Mumbai

- **Received an award for outstanding performance and contribution to the team.**
- Designed and developed modular, reusable Angular components and services following internal architecture guidelines and frontend best practices.
- Implemented REST API integrations, managing data flow, validation, error handling, and UI state for dynamic interfaces.
- Contributed to deployment cycles through build verification, testing, and resolution of post-deployment issues to maintain production stability.
- Collaborated with software engineers, QA teams, and product owners in an Agile environment while ensuring responsive design, cross-browser compatibility, and application performance.

ICICI Lombard

February 2025 – July 2025

Software Engineering Intern

Mumbai

- Delivered multiple UI enhancements and bug fixes under production timelines.
- Gained experience with enterprise development workflows, Git-based version control, and Agile sprint execution.

Accenture

May 2024 – July 2024

ASE Summer Intern

Mumbai

- Created Power BI dashboards that reduced manual reporting time and provided five project managers with real-time insights.
- Documented and automated three processes using Blue Prism, improving workflow speed in customer service.

Projects

Visual-Based Password Authentication System | Python

August 2024

- Designed and implemented an image-based authentication system using user inputs such as numbers, colours, and objects.
- Used a generative model to produce visually similar images, leveraging human visual recognition to improve password security.
- Enhanced MFA security by making it harder for automated systems to identify the correct password image.

Title Search of Documents in English/Marathi Language | C#

June 2023

- Developed a program to automate property deed searches across English and Devanagari Marathi, supporting variations in names and numbers.
- Reduced search results by ~80%, from 300–500 to 50–100, streamlining document review for legal professionals.
- Reduced document review time by ~60% through batch downloads and multi-filter searches, while enabling users to save and reuse search results.

Technical Skills

Programming Languages: Python, Java, C, C#, JavaScript, SQL

Development: Angular, React, Next.JS, Flutter

Developer Tools/Frameworks: VS Code, Power BI, Git, Postman

Spoken Languages

English: CEFR C1, Professional

Hindi: Native, Professional
